

# Journal of Remote Sensing and Environment

Published by SPARRSO

## Guidelines for Authors

This is a multidisciplinary journal published by Bangladesh Space Research and Remote Sensing Organization (SPARRSO). It covers studies preferably using remote sensing and GIS technology on various aspects of natural and environmental sciences like agriculture, forestry, fisheries, cartography, meteorology, climatology, geography, geology, hydrology, water resources, oceanography and disasters. The scope of the journal also includes disciplines like space science and technology, image processing and spatial analysis. The list is, however, not exhaustive.

**Frequency:** The journal is published once a year.

**Contribution:** Original research work is published. However, review papers and technical notes are also considered. The manuscript should be unpublished and should not be under consideration for publication elsewhere.

**Language:** English but Bengali is also acceptable. Manuscript submitted in Bengali should be accompanied by an abstract in English.

### **PREPARATION OF THE MANUSCRIPTS:**

#### **General Layout:**

- a. The paper should include a cover page with a title not exceeding 20 words stating briefly the scope of the work. The title page should include full name(s) of author(s), academic or professional affiliations accompanied by an abstract of not more than 200 words. In addition to the cover page, the paper should have (i) the main text, (ii) acknowledgments (if any), (iii) appendices (if any), (iv) references, (v) list of figures and tables with captions.
- b. The paper should preferably be subdivided and each subdivision should have a short heading with section and subsection numbers.
- c. Reference in the text should be cited by the name(s) of the author(s) followed by the year of publication *e.g.*, (Karim *et al.*, 1992) or by Karim (1992). The list of references should be prepared according to the following examples: (1) Journals: Karim, J., and Rahim, S., 1995, Inferring Surface Albedo from Remote Sensing Measurements, *International Journal of Remote Sensing*, **4**, 345-355. Books: Suja, S., 1993, Remote Sensing Data Analysis, Dhaka, Bangladesh, Publisher, p. 127.
- d. Each table or figure should be given on separate sheets.
- e. Lists of tables and figures with captions should be included on separate sheets.
- f. All papers except technical notes should preferably be confined within 5000 words and technical notes should not have more than 1200 words.

**Illustrations:** One set of figures submitted should be in original on good contrast paper and all illustration should be numbered consecutively and referred to in the text. Photographs must be of good quality and printed on glossy paper.

**Units:** SI unit should be used.

**Submission of papers:** Paper should be type written in double spacing on one side of A4 size paper and should be submitted in triplicate (along with a MS-Word softcopy) to the Chief Editor at the following address:

Chief Editor  
Journal of Remote Sensing and Environment  
Bangladesh Space Research and Remote Sensing Organization (SPARRSO)  
Agargaon, Shere Bangla Nagar, Dhaka-1207, Bangladesh  
Tel: 880-2-913 1741, 9113329, Fax: 880-2-813080  
E-mail: admin@sparrso.gov.bd

Each papers will pass through a reviewing process.

**Proofs:** The principal or corresponding author will be sent proofs for checking.
